FOR IMMEDIATE RELEASE

Amun AG lists the world's first two physically backed crypto-currencies single-coin exchange-traded products: Bitcoin (BTC) ETP (Ticker: ABTC) and Ethereum (ETH) ETP (Ticker: AETH) on the SIX Swiss Exchange

- The Amun Bitcoin ETP (ticker: ABTC) and the AMUN Ethereum ETP (ticker: AETH) is listed on the SIX Swiss Exchange. Follows Amun's launch of world's first listed crypto index (ticker: HODL) in November 2018.
- Switzerland offers an excellent regulatory environment to access the crypto asset class through professional and well-structured financial products such as Amun's ETPs.
- Investors can finally buy Bitcoin and Ethereum in a professional and reputable jurisdiction without worrying about custody, which for the underlying component of the ETP, is handled by qualified, licensed, and regulated independent custodians and also held in cold storage.

Zurich, 05 March, 2019

Amun AG, a Swiss fin-tech special purpose company, launched the world's first two physically-backed crypto Bitcoin ETPs (tickers: ABTC, ISIN: CH0454664001 and AETH, ISIN: CH0454664027). ABTC gives investors access to the world's most popular crypto asset while AETH gives investors access to the preeminent smart-contracts platform, Ethereum. This follows the previous launch of Amun Crypto Basket Index ETP (ticker: HODL, ISIN: CH0445689208), the world's first listed crypto index product. The Amun Bitcoin ETP and the Amun Ethereum ETP are fully collateralised products, denominated in US dollars, and with annual investor fees of 2.5%.

Hany Rashwan, CEO and co-founder of Amun AG:

"The mission of our company is to make crypto investing as easy as buying a stock, and the launch of the Amun Bitcoin ETP and the Amun Ethereum ETP are crucial steps in this process after our initial launch of Amun Crypto Basket Index ETP (ticker: HODL) in late 2018. With both HODL for the index and ABTC and AETH for the single coins, we have given investors around the world access to this innovative and exciting asset class through a regulated exchange and the traditional financial market. We seek to give investors the perfect tool set to execute their crypto investing strategy, whether it's a re-balancing "buy the market" product or single assets. We also plan to launch more products across multiple geographies."

Ophelia Snyder, Chief Product Officer and co-founder of Amun AG:

"There is nothing else in any financial market like our growing family of ETPs. In the expanding market of crypto assets globally, there have hardly been any suitable financial instruments for the vast majority of investors. With our first product, HODL, we overcame the obstacles of diversification, inadequate regulatory standards and limited tradability. With our second and third products, ABTC & AETH, we offer investors the ability to purchase a single-coin ETP that has the benefit of a market maker to ensure liquidity and that is 100% physically-backed. Our ETPs are very similar and have the same principal characteristics as a physical gold ETP and therefore appeal to a wide range of investors"

Mark Rodino, Managing Director & Head of Global Distribution of Amun AG

"We continue to live in uncertain times and Bitcoin can act as a store of value and is actually quite complimentary to gold, the traditional store of value. Furthermore, Bitcoin is uncorrelated to traditional asset classes and the volatility has dropped substantially which could be important to some investors. And for other investors we offer an ETP structure which is exchange-regulated, transparent and tradeable with high liquidity and tight spreads. For investors that are focused on purchasing the largest and most well-established, open-ended decentralised software platform that enables Smart Contracts and Distributed Applications, Amun offers the Ethereum ETP"
